

Amir Reza Khatibi

Data Science & Engineering MSc Student | Data Engineer

 Turin, Italy  +39 351 893 9187

 amirreza.khatibi@studenti.polito.it  amirrezakhatibi  Toukenmn

Profile

Data Science and Engineering MSc student and Data Engineer Intern with hands-on experience in data engineering, machine learning, computer vision, and NLP. Experienced in building data models and transformation workflows using Snowflake, dbt, and AWS services, as well as developing end-to-end machine-learning and ETL pipelines from data ingestion and preprocessing to evaluation and deployment.

Experience

Data Engineer Intern

05/2026 – Present

Target Reply

Turin, Italy – Hybrid

- Develop and maintain data entities for different functional areas of the project using **dbt** on **Snowflake**.
- Create transformation models that structure project data into reusable, consistent, and documented entities.
- Work with **Amazon S3** and **AWS Glue** as part of the project's cloud-based data storage and processing workflows.
- Document data entities, transformations, mappings, and project logic using **Microsoft Excel**.

Education

Master's Degree in Data Science and Engineering

10/2025 – 10/2027

Politecnico di Torino

Turin, Italy

- Focus on machine learning, deep learning, data engineering, and statistical modeling.

Bachelor's Degree in Computer Engineering

10/2022 – 10/2025

Politecnico di Torino

Turin, Italy

- Final grade: **110/110**.
- Selected member of the **INTRAPRENDENTI Project** Honors School.
- Member of **IEEE-Eta Kappa Nu**, Mu Nu Chapter.
- Relevant coursework: Algorithms and Data Structures, Object-Oriented Programming, Databases, Operating Systems, Computer Networks, Probability and Statistics, and Linear Algebra.

Projects

Evaluating and Fine-Tuning EoMT for Cross-Domain Semantic Segmentation and Anomaly Detection

- Evaluated and fine-tuned the **Encoder-only Mask Transformer** for cross-domain semantic segmentation between **COCO** and **Cityscapes** datasets.
- Improved validation mIoU from **50.7%** to **75.3%**, an increase of **24.6 percentage points**.
- Evaluated MSP, MaxLogit, MaxEntropy, and RbA anomaly scores across multiple road-scene anomaly datasets.
- Technologies: **Python**, **PyTorch**, **Computer Vision**, **Semantic Segmentation**, **Anomaly Detection**.

Weather ETL Pipeline

- Designed and implemented an ETL pipeline for weather-data collection, transformation, validation, and storage.
- Automated data ingestion from external APIs and performed preprocessing and data-quality checks.
- Orchestrated scheduled workflows using **Apache Airflow** and containerized the pipeline with **Docker**.
- Deployed the pipeline on **AWS EC2** and used **Amazon S3** for cloud-based data storage.

Skills

Programming	Python, C, C++, Java
Data Engineering	Snowflake, dbt, PostgreSQL, MySQL, MongoDB, ETL Pipelines, Apache Airflow, AWS(EC2, Glue, S3), Control-M, PySpark, Hadoop
Data Science & ML	NumPy, Pandas, Scikit-learn, PyTorch, Tensorflow, Matplotlib, Seaborn
Tools	Git, Docker, Linux, Jupyter Notebook, Matlab, Microsoft Excel, Power BI, Qlik
