Profile

Data Science and Engineering student with hands-on experience in **ML**, **data engineering**, and **NLP**. Skilled in building end-to-end pipelines, from data ingestion to deployment, and translating data into actionable insights.

Education

- 10/2025 – 10/2027 **Master's Degree in Data Science and Engineering**, *Politecnico di Torino*, Turin, Italy
Focus on machine learning, data engineering, statistical modeling and large-scale data analysis.
- 10/2022 – 10/2025 **Bachelor's Degree in Computer Engineering**, *Politecnico di Torino*, Turin, Italy
- Final grade: **110/110**
 - Selected member: **INTRAPRENDENTI Project** (Honors School)
 - Member: **IEEE-Eta Kappa Nu** (Mu Nu Chapter)
 - Relevant coursework: Algorithms and Data Structures, Signals and Systems, Databases, Operating Systems, Computer Networks, Probability and Statistics, Linear Algebra

Experience

- 10/2025 – 01/2026 **Teaching Assistant – Signals and Systems**, *Politecnico di Torino*, Turin, Italy
- Supported more than **300** students through office hours and laboratory sessions
 - Contributed to improved student performance and pass rates
- 10/2024 – 12/2024 **Laboratory Teaching Assistant – Algorithms and Data Structures**, *Politecnico di Torino*, Turin, Italy
- Assisted **200+** students in implementing data structures for complex algorithmic problems
 - Covered **complexity analysis, recursion, sorting, debugging, dynamic programming, graphs**
 - Improved overall course outcomes and student success rates

Projects

Weather ETL Pipeline (GitHub link)

- Designed and implemented an end-to-end **ETL pipeline** for weather data collection, transformation, and storage
- Automated data ingestion from external APIs and performed preprocessing and validation steps
- Orchestrated workflows using **Apache Airflow**, enabling scheduled and scalable data pipelines
- Containerized the pipeline using **Docker** for reproducibility and consistent deployment
- Deployed and managed components on **AWS**, leveraging cloud infrastructure for scalability and reliability
- Stored processed data in structured formats for downstream analytics and visualization

SQL Data Warehousing (GitHub link)

- Designed and implemented a **data warehouse schema** using SQL for analytical workloads
- Developed ETL processes to transform and load structured data into fact and dimension tables
- Applied **star schema modeling** to support efficient querying and business intelligence use cases
- Wrote optimized SQL queries for data analysis and reporting

Skills

Programming	Python, C, C++, Java
Data Science & ML	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch
Data Engineering	SQL, MongoDB, Data Warehousing, ETL Pipelines, Apache Airflow
Tools	Git, Linux, Jupyter Notebook, MATLAB, Microsoft Office, PowerBI, Docker, AWS, FastAPI
